

# Enrichment Book Club

(For students in grades 3-8)

Research confirms that student motivation is a key factor in successful reading. Book clubs can be an excellent venue for building excitement and friendship over good books. The small group setting will invite children into active learning and provide them with opportunities to speak, interact, and exchange points of view.

What the program has to offer:

- Provides a fun, engaging, and motivating book club.
- Pairs literature with discussions and activities.
