

Creating an Ecological Society

A Presentation by Fred Magdoff

*Fred Magdoff is professor emeritus of plant and soil science at the University of Vermont and a long-time commentator on political-economic topics. He is coauthor of *The Great Financial Crisis and What Every Environmentalist Needs to Know About Capitalism*.*

Sickened by the contamination of water, air, of the Earth itself, more and more people are coming to realize that capitalism is, quite literally, killing them. Already, hundreds of millions of people are facing poverty in the midst of untold wealth, perpetual war, growing racism, and gender oppression. The need to organize for social and environmental reforms has never been greater. But

*crucial as reforms are, they cannot solve our intertwined ecological and social crises. *Creating an Ecological Society* reveals an overwhelmingly simple truth: Fighting for reforms is vital, but revolution is essential.*

Tuesday, October 30th from 2:00 - 3:30 PM
in Niagara University's Golisano Center Room 101

Co-Sponsored by the Office of Multicultural Affairs, Political Science Department, and NU CARES
